PROTEKT®

ROOF LADDER HOOKS

The roof ladder hooks is used to facilitate the transport of a roofing ladder on the roof and its easy installation over the ridge. The handle is in the form of a trolley with rubber wheels that protect the roof against damage and scratches. Transport of the trolley takes place on the „left” side, after reaching the ridge with the end of the ladder with the hook part, the entire ladder with the handle is turned to the „right” side and the hook part with wheels mounted transversely is locked on the ridge, enabling safe use of the ladder.

PARAMETERS

Construction material	steel
Wheel material	plastic, rubber
Weight	7.0 kg (set)
